Town of Cutler Bay – Resurfacing Improvements

Fast Facts:

Total Project Costs:

\$ 986,375

Schedule:

Contract Advertised on:
September 2009

Contract Awarded on:
December 2009

Beginning of Construction:
January 2010

Anticipated Completion:
June 2010

Jobs Created/Supported Estimated: 26

Project Summary

Many of the Town's primary roadways have not been repaved in over 20 years, and exhibit a high degree of pavement distress. As part of the resurfacing improvements 9.3 miles of the Town's collector and arterial roadways are being resurfaced with 1" of fresh asphalt. The roadways to be improved are: Old Cutler Road, Caribbean Blvd., Marlin Road, SW 87th Avenue, Quail Roost Drive and Franjo Road. In addition, damaged sidewalks along these routes will be repaired and ADA ramps added as needed. These roadway resurfacings and sidewalk improvements will lead to improved ride-ability, safety and mobility for the users of the Town's roadway and sidewalk network.

This project is being funded through the

American Recovery and Reinvestment Act of 2009
